

Overview of Service

This Licence enables users to convert Amazon raw data into VAT Return compliant data. In particular, the Licence enables users to:

- upload electronic data direct from Amazon
- control distance selling thresholds for each country
- download VAT reports across all relevant countries, including:
 - FBA inventory warehouse movements with VAT
 - Above threshold sales in non-FBA countries
 - Inbound stock transfers from non-FBA countries
 - All income for country of establishment returns
- convert data into formats ready for use in VAT Returns in all relevant countries – place of establishment, departure and arrival

Key Features

- **Unlimited Transactions:** Users can prepare as many Amazon uploads for any number of companies, each with unlimited transactions. This means that the service is very cost-effective
- **Control of Distance Selling Thresholds:** This enables accurate billing in each country, and compliant VAT return data.
- **Free Setup Facility:** There is an easy to use guide to help you get set up in minutes. However, if you want a bespoke system to help with transferring data, please ask us to quote
- **Legislative Updates:** Any changes required by any European country (e.g. One Stop Shop) are automatically included, so you don't have to worry
- **Unlimited Users:** You can authorise additional users in blocks of 5. Within each block, individual users can be added or changed each with varied accessibility to give you maximum control and flexibility
- **Validation Tests:** Free tests check that data is safe to import
- **Export Submission:** All converted data is exportable in Excel, but if you wish to export in an alternative format e.g. XML, CSV, PDF please ask us to quote
- **Simple & Very Fast:** The system is very easy to use and very fast

Getting Started

i If you are already registered to use another euVAT service, your Principal user can simply add the Amazon Licence to your organisation’s existing package.

If you are not registered, your first step is to register for the Master Licence by visiting <https://register.euvat.org> and choosing the Amazon Licence.

When you first register, you will be asked for basic contact details of the Licensee; this does not have to be the organisation for which Amazon data is to be uploaded.

Once registered, you as Licensee will be provided with a pro forma invoice. Once payment has been made, your account will be activated.

Pricing

	Price	Description
System Licence *	£2,500	per Year
Additional Users **	£250	per Month

All prices subject to applicable VAT

- * If another euVAT service licence has been activated, the licence fee is apportioned until the next Renewal Date
- ** Per block of 5, with a minimum duration until the next Renewal Date
